

# RAIL WATCH - HIGH SPEED RAIL ROUTING DIAGRAM - W/ PROPOSED ALTERNATE Bus Rapid Transit (BRT) OR Metro Light Rail (LRT) connection to downtown in lieu of HSR

| LEGEND                             |  |
|------------------------------------|--|
| HIGH SPEED RAIL (ORANGE)           |  |
| BRT OR LIGHT RAIL PROPOSED (BLACK) |  |
| EXISTING LIGHT RAIL (RED LINE)     |  |
| EXISTING LIGHT RAIL (PURPLE LINE)  |  |

**WHY?**  
 Metro Light Rail or Bus Rapid transit in I-10 High Speed Corridor will solve the transit connection from Downtown to West Houston and alleviate future proposals routing Gulf Coast Regional Rail (heavy freight train) through residential communities.

**WHY?**  
 Because Metro Light Rail or Bus Rapid Transit can provide a rapid commuter solution from the HSR station To Downtown. Simultaneously it can serve as a commuter transit system for Houston's commuters connecting Northwest Transit Center with Downtown.
